How does it work?

The smarter way to shop

Shoppers don't have time to trawl through endless reviews. Dynamic topic display lets you cut through the noise and give customers access to the feedback that matters most to them. Our comprehensive suite of customizable, AI-powered feedback displays transforms the way shoppers engage with customer feedback and helps drive conversions across your site.
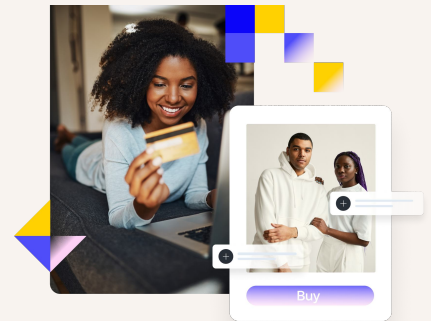

Enhance every customer journey

Automatically track customer opinion across your reviews, pick out the most popular themes and organize feedback into convenient topics your customers can use to make better buying decisions. Showcase your best content across your website using the Highlighted Snippet feedback display. Build trust and reduce cart abandonment by placing your best reviews at any point in the buyer journey, from when they 'Add to basket' to when they're at the checkout.

Give your customers more reason to buy

Increase your online sales by up to 13.5% by integrating Dynamic topic display with your product pages. Reducing the time it takes for customers to find the information they need creates a fluid user experience that keeps shoppers on-site longer and removes the need for a second opinion. Enhance your product and service pages even further with our Highlighted Topic feedback display; letting you easily display your customer's most loved features to new shoppers visiting your site.

Fully customizable feedback displays

Turn your reviews into branded content with simple feedback display customization. Change the color, font and formatting of your feedback displays to fit your branding and create a consistent customer journey. See exactly what each of the feedback displays will look like on your web page before committing with the feedback display builder.
